XPERT POWERLIFT VACUUM GLASS LIFTER

Got questions about your Xpert PowerLift Battery Vacuum Glass Lifter? You're in the right place!

We understand that using a new piece of equipment can sometimes raise a few queries, especially when it comes to safely handling heavy glass panes. That's why we've compiled these comprehensive FAQs, covering everything from charging your battery and cleaning your device to understanding the auto air replenishment feature. Whether you're a seasoned glazier or professional installer, these answers will help you get the most out of your Xpert PowerLift.

FAQs

What is the Xpert PowerLift and what is it used for?

The Xpert PowerLift is a battery-powered vacuum lifter designed to lift and manoeuvre materials with non-porous surfaces, such as glass, tile, and some sheet metals.

What is the maximum weight capacity of the Xpert PowerLift?

The Xpert PowerLift has a maximum lifting capacity of 100kg vertical and 100kg horizontal.

What type of battery does the Xpert PowerLift use?

The Xpert PowerLift uses a 3.7V rechargeable lithium battery.

How long does it take to charge the battery?

It takes approximately 2 hours to charge the battery fully.

How do I know when the battery is fully charged?

If the charging indicator light is red, the battery is still charging. If the charging light is green, the battery is fully charged and ready to use.

Can I use a different USB charging cable?

No - only use the USB charging cable supplied with the PowerLift as non-genuine cables could cause fires, personal injury or damage.

How long can I use the Xpert PowerLift on a full charge?

Under normal working conditions, you can use the PowerLift for over 8 hours on a full charge.

What is auto air replenishment?

Auto air replenishment means the device automatically maintains a consistent vacuum seal while you are lifting. This enhanced seal improves safety.

What is the diameter of the Xpert PowerLift suction cup?

The suction cup is 8 inches (200mm) in diameter.

What is included with the Xpert PowerLift?

The Xpert PowerLift Battery Vacuum Glass Lifter comes with the following:

- USB-C charging cable
- Suction cup cover
- Air filter
- Carry box

How do I clean the Xpert PowerLift?

Clean the surface of the Xpert PowerLift using a damp cloth or sponge or use a mild detergent to remove stubborn dirt or residue. Avoid using harsh or abrasive cleaners, gasoline, benzine, thinner or alcohol as this could damage the rubber cup over time.

What safety features does the Xpert PowerLift have?

- Sturdy double-layer rubber suction cup for a superior seal
- Automatic air replenishment to maintain a secure vacuum
- Visual power indicator tells you when the battery is low
- Temperature protection to prevent overheating
